

IN THE SPECIFICATION

Please replace the paragraph at page 38, line 23 – page 39, line 17, with the following rewritten paragraph:

Here, "Title" in the list of the program above is a link button and when this button is clicked, detailed information of the live program of the clicked "Title" appears as shown in FIG. 16. On this screen, if the user enters a correct password and clicks on the "Replay" button 175 during the time for distribution of the relevant program, a distribution request for the relevant live program is sent to the streaming server 102 over the Internet 103. This allows the client PC 107 that has sent the distribution request to receive a stream distribution of the relevant live program content by the streaming server 102 and reproduce this in real time. By the way, reproducing the content streaming-distributed by the streaming ~~sever~~ server 102 in real time requires replay software to perform this real-time replay processing (e.g., "Real player" (Real Networks Co., Ltd.) and "Windows Media Player" (Microsoft Corporation), etc.). Therefore, if the PC that sends a distribution request does not store the above replay software, the "Replay software" button 176 is clicked. This makes it possible to download the above Replay software to the PC and reproduce and view the content stream-distributed by the streaming server 102 in real time by the relevant PC.
